(D) biotechnology;

(E) quantum computing;

(F) surveillance technologies, including facial recognition technologies and censorship software; and

(G) fiber optic cables;

(3) coordinating with such countries regarding shared technology strategies, including technology controls and standards, as well as strategies with respect to the development and acquisition of key technologies to provide alternatives for those countries utilizing systems supported by authoritarian regimes;

(4) coordinating the adoption of shared data privacy, data sharing, and data archiving standards among the United States and partner countries and relevant economic and political unions, including complementary data protection regulations;

(5) coordinating with other technology partners on export control policies, including as appropriate through the Wassenaar Arrangement On Export Controls for Conventional Arms and Dual-Use Goods and Technologies, done at The Hague December 1995, the Nuclear Suppliers Group, the Australia Group, and the Missile Technology Control Regime; supply chain security; and investment in or licensing of critical infrastructure and dual-use technologies;

(6) coordinating with members of technology partnerships on other policies regarding the use and control of emerging and foundational technologies through appropriate restrictions, investment screening,

and appropriate measures with respect to technology transfers;

(7) coordinating policies, in coordination with the Department of Commerce, around the resiliency of supply chains in critical technology areas, including possible diversification of supply chain components to countries involved in technology partnerships with the United States, while also maintaining transparency surrounding subsidies and product origins;

(8) sharing information regarding the technology transfer threat posed by authoritarian governments and the ways in which autocratic regimes are utilizing technology to erode individual freedoms and other foundations of open, democratic societies;

(9) administering the establishment of—

(A) the common funding mechanism for development and adoption of measurably secure semiconductors and measurably secure semiconductors supply chains created in and in accordance with the requirements of section 9905 of the William M. (Mac) Thornberry National Defense Authorization Act for Fiscal Year 2021 (Public Law 116-283); and

(B) the multilateral telecommunications security fund created in and in accordance with the requirements of section 9202 of such Act; and

(10) collaborating with private companies, trade associations, and think tanks to realize the purposes of paragraphs (1) through (9).

(f) **REPORT.**—Not later than one year after the date of the enactment of this Act, and annually thereafter for the next 3 years, the Secretary of State, in coordination with the Director for National Intelligence, shall submit an unclassified report to the appropriate congressional committees, with a classified index, if necessary, regarding—

(1) the activities of the Office, including any cooperative initiatives and partnerships pursued with United States allies and partners, and the results of those activities, initiatives, and partnerships; and

(2) the activities of the Government of the Peoples' Republic of China, the Chinese Communist Party, and the Russian Federation in key technology sectors and the threats they pose to the United States, including—

(A) artificial intelligence and machine learning;

(B) 5G telecommunications and other advanced wireless networking technologies;
